AUGUST 12 & 13

1:00PM - 2:30PM ET

COST:

PIA MEMBERS: \$175

NON-MEMBERS: Contact Karissa Melara
for pricing. (karissa@piasc.org)

With the increasing demand for efficient project delivery, mastering the art of project management has become a critical skill for both businesses and individuals. Project management is the practice of planning, organizing, and managing resources to achieve specific goals and objectives, while adhering to the predefined project parameters. It provides control over the project lifecycle, from its initiation to its completion. Whether a business is planning a small-scale project or a large-scale initiative, effective project management is the key to ensuring success.

The Project Management 7th Edition course will cover principles and techniques in accordance with the Project Management Body of Knowledge (PMBOK) 7th Edition, which is the globally recognized standard for project management best practices. Participants will gain an understanding of value delivery, project management principles, as well as performance domains that are important for final delivery outcomes. As the world continues to change with technology evolving and new organizations emerging, it's important to reconsider the global perspectives that are found within the PMBOK Guide.

Workshop Objectives

- Define projects and project management
- Explore the changes with the 7th edition and past editions
- Recognize the factors that contribute to a system for value delivery
- Identify the ethics that are most important for project management
- Explore the 12 Project Management Principles
- Identify the 8 Project Performance Domains
- Understand the Tailoring Process
- Define and explore models, methods, and artifacts

REGISTRATION

Registrations will be to karissa@piasc.org

Materials will be sent to every registrant one week before the sessions begin.
